# The Underbuzz

Parking and Driveways: In my travels and on occasion I've noticed a bus parked on the roadside near a business and in close proximity to a driveway. I haven't audited any recent training sessions for new drivers in some time. I wonder if they ever talk about this subject. We are driving the people's bus. Do the people desire their bus to be blocking their view when they are trying to exit a parking lot? I think not. Buses are a convenience for the people so hundreds of cars are not all surrounding a school to drop or retrieve students. It may be convenient for the driver of the bus but that's not why they pay taxes. Emergencies happen. However, we as bus drivers should take the taxpayers safety into consideration, when and where we park their bus. Inconspicuous and out of harms way is the smart thing to do when ever possible.

Safe and Respected:
